Holyoke Water Power Co.

This company was incorporated in 1859, buying the stock, etc., of the old Hadley Falls Company, which had built the dam, started the canals, and built a large machine-shop and two large cotton-mills. The capital stock of the present company is \$600,000. President, George M. Bartholomew, of Hartford. Conn.; agent and treasurer, William A. Chase of Holyoke.

The fall of the river in the rapids is 60 feet.

The gateways, canals, etc., have all been planned on this basis. The main canal at its head and for some distance below is 140 feet wide and 22 feet deep, and the flow of water through the main gate is 6,000 cubic feet per second. This canal is over a mile long, and the difference in height between it and the second level is 20 feet. The second level, considerably over two miles long, 140 feet wide and 15 feet deep, is divided conveniently into two sections. The first, which runs parallel to the upper level and four hundred feet distant from it, makes a race-way for its water, and at its southern end supplies power to a few large mills, giving them a head of twelve feet above the level of the third level canal, which starts at that place.

The second section starts from the northern end of the first section and follows the course of the river, keeping about 400 feet from it, and furnishing a head of from 23 to 28 feet to the mills on its banks.

Between the lower ends of these two sections and following the course of the river is the third level canal, which is 100 feet wide and 10 feet deep, and gives a head of from 23 to 28 feet above the river.

A "mill-power" is the right during 16 hours per day to draw from the nearest canal 38 cubic feet of water per second with a head of 20 feet which is equivalent to 89 horse-powers, of which the wheels now in use will save 65 horse powers. The annual rental per mill-power is 260 ounces of silver (\$300 has always been accepted in lieu thereof), or \$4.62 per horse-power. (The lowest cost ever calculated for steam power is \$19.89 a year per horse-power; over four times the cost of water.)

Phillips Felting Works,

Manufacture and apply the celebrated

PHILLIPS BOILER AND PIPE COVERINGS,

Largely in use and acknowledged the BEST and CHEAPEST. Will greatly reduce the temperature in overheated rooms, and take steam dry to points desired, saving from 15 to 30 PER CENT IN FUEL, or producing a corresponding ADDITIONAL POWER. It will not corrode, but preserve the iron; is FIRE-PROOF and will NOT CRACK and come off, but will last as long as the article to which it is applied, and can easily be removed and replaced as good as new AFTER YEARS OF USE. It is the best covering for tops of boilers (instead of bricking over), as it radiates LESS HEAT, is lighter, takes up less room, wears much longer, and COSTS LESS MONEY. It also prevents COLD WATER PIPES FREEZING OR SWEATING, and has superior merit for LINING FLOORS OR PARTITIONS in buildings, as it is FIRE-PROOF, and the best NON-CONDUCTOR OF SOUND.

Material sold by the barrel, with full instructions for applying, and work taken by the foot or contract in any part of the country and satisfaction guaranteed. Orders respectfully solicited and promptly executed.

The New England Conservatory of Music.

The Largest and Best Appointed School of Music, Literature and Art in the World.

The beautiful park in front, and the surrounding broad streets, make it both healthful and delightful. It is splendidly equipped for both Home and the Schools, furnishing Home accommodations for 550 lady students, and Class Accommodations for 3,000 lady and gentlemen students. Send for new Calendar, beautifully illustrated, free. Students received at any time.

TUITION, \$5 to \$20 per term of Ten weeks. Board and Room Rent, Light, Heat, etc., \$4.50 to \$7.50 per week.

MUSIC is taught in all its departments, **Instrumental and Vocal**, including Pianoforte, Organ, Violin and all Orchestral and Band Instruments, Voice Culture and Singing, Harmony, Theory and Orchestration, Church Music, Oratorio and Chorus practice, Art of Conducting; also Tuning and Repairing Pianos and Organs. All under the very best teachers in classes and in private.

ART DEPARTMENT. Drawing, Painting and Modeling from Casts and from Nature, in Crayon, Water and Oil Colors; Portraiture and China Decorating with some of the best artists in the country.

COLLEGE OF ORATORY. Elocution and Dramatic Action, English branches, Common and Higher. Modern Languages: German, French, Italian and Spanish, with the best native and foreign professors. Students can here pursue their literary studies in connection with music, thus acquiring that higher and broader culture which is now required of professors of music.

THE NEW HOME is located in the heart of Boston, confessedly the Musical, Literary and Artistic Centre of America.

Manufacturers.**CAREW MANUFACTURING COMPANY.**

Founded in the early part of 1848 under the management of Joseph Carew. The first mill commenced work June 19, 1848, taking its water from the old canal. The products then were the finest grades of writing papers, and they have improved in quality as paper generally has improved, always ranking among the first. The company manufactures ledgers, linens and superfine writing. The mill contains one 80 inch machine, three 800-pound and two 600 pound engines, turning out three tons daily. Number of hands 100. Monthly pay-roll, \$3,000. The present mill was built in 1873, taking the place of the one burned in the summer of that year. The officers of the corporation are: President, J. C. Parsons; agent and treasurer, Charles W. Gardner; clerk, H. P. Mallory.

HAMPSHIRE PAPER COMPANY.

The mill now managed by the Hampshire Paper Company was built in 1863; the present company being organized and assuming control in 1866, with a capital stock of \$200,000. The mill uses three mill powers, running seven 600-pound engines, one 62-inch and one 72-inch machine, and turning out three tons of fine writing paper and bristol board daily. There are 150 hands employed, and the pay roll is \$3,500 per month. The officers are: President, J. H. Southworth of Springfield; treasurer, C. H. Southworth of Springfield; Superintendent, Richard Goodhind.

GLASGOW COMPANY.

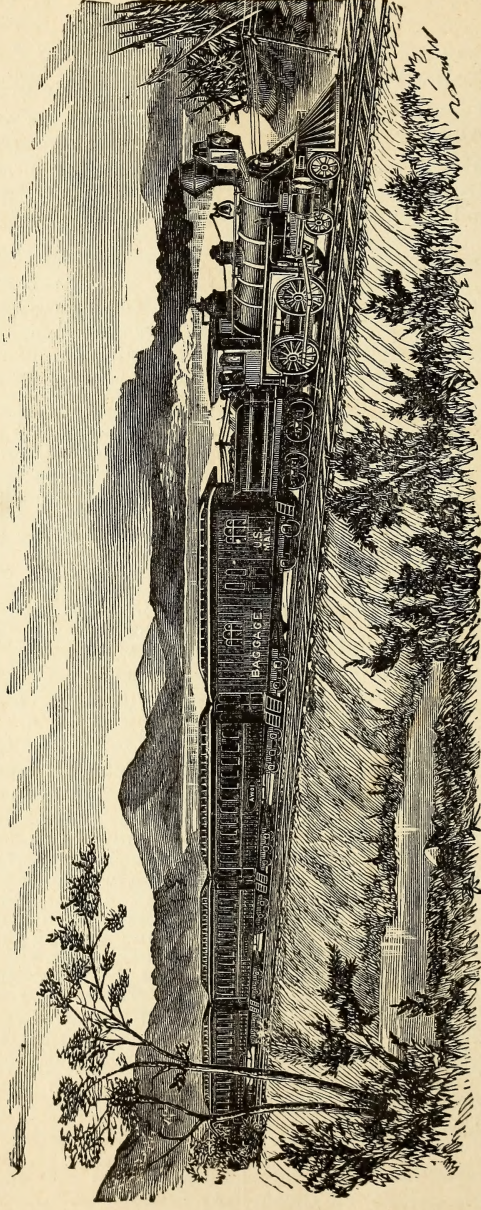

Organized 1848. Capital stock, \$350,000. Manufactures dress goods. Product 70,000 yards per week. Employs 200 males and 150 females. Monthly pay roll \$10,000. Officers: President, J. H. Southworth of Springfield; treasurer, Geo. M. Atwater of Springfield; agent and clerk, B. C. Brainard, South Hadley Falls.

Holyoke Water Works.

This department of the city is under the charge of a Water Board of three members, registrar and superintendent; James F. Allyn, chairman; J. A. Sullivan, treasurer; Timothy Merrick, secretary; E. P. Clark, water registrar; John D. Hardy, superintendent. Surveys for the supply of water for the city were commenced in the fall of 1871, and the works were fully completed August 6, 1873. Two natural

mountain ponds (Ashley and Wright), with their inexhaustable supply from a water shed of 1,726 acres (which delivers an average of 2,568,121 gallons into the ponds daily.) forming a flowage area of 211.8 acres. The ponds are located within the city limits, being 3.59 miles from the City Hall. The carrying capacity of the supply main (constructed of cast iron), standard weight, is 2,666,000 gallons or more in 24 hours. The legislature authorized the town to issue bonds to the amount of \$250,000, which covered the entire cost of construction. In 1881 the brooks known by the names of Riley and Tannery brook, were turned into the main pipe near the Wright pond, and it is estimated that the addition to the water supply is increased nearly, or quite, one-eighth. In 1884 the Commissioners built a dam at the "Whiting Street Brook" and have carried the main pipe to that point. With that addition Holyoke probably has a supply sufficient for double its present population.

PATENT READY-WOUND BOBBINS,

FOR SEWING MACHINE SHUTTLES.

They are Wooden Bobbins, filled with thread, all ready to put into the shuttle, and as perfectly wound as an ordinary spool, giving a more perfect tension and better work than the ordinary iron bobbin filled by the operator.

The above is a cut showing the bobbins as they are put up for family use in boxes, the bobbins in each box holding in the aggregate 200 yards of thread, corresponding in quantity to an ordinary spool. For manufacturers' use they are put up in boxes containing one gross each.

PAID UP AND CASH VALUES.

Under the new non-forfeiture law of Massachusetts, all policies issued on and after January 1, 1881, have a fixed and definite value in paid-up insurance, and (with certain provisos) in cash, thus enabling the policy holder to determine for himself at any time the amount to which he is entitled in case of lapse or withdrawal. This equitable provision of the law combines the elements of a

Artesian or Driven Wells.

All Orders for Wells for Domestic, Farm, Manufacturing or any other Purposes will Receive Prompt Attention.

We are prepared to sink Wells 6 or 8 inches in diameter through Earth or Rock to One Thousand feet or less, by Steam Power.

Many of these Wells are being used at Breweries and other manufactories where cool water is needed and the soil is hard and rocky.

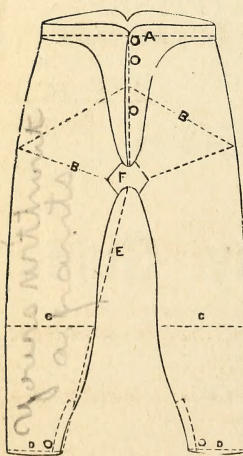

Sand and Vacuum Chamber, for Artesian or Driven Wells.

Patented Sept. 11, 1877, No. 195,051; - July 27, 1880, No. 230,579.

We claim for our Sand and Air Chambers that there is no better in the market; warranted to stop sand or money refunded. The sand is retained in the bottom of chamber, and can be removed by taking out the plug at the bottom, tripping the pump, and running water through it.

The "Hub" Wraps and Drawers.

(PAT. AUGUST 8. 1871.)

Have many superior advantages over all others. Letter F in cut shows the PATENT SUSPENSORY GORE, which removes all disagreeable points, such as seams, extra cloth and tightening over the knee; it removes the unpleasant feeling experienced in all others, both foreign and domestic, and are indispensable for large men that appreciate comfort. Also, the wrap opening in front gives it a superiority of adjustment, as it fits loosely, it remains in position and is not so oppressive in warm weather as the light weights of merino fabric (and for winter wear has a chest protector attached which prevents colds, neuralgia, catarrh; pneumonia, &c.), as thousands will testify, to their great value; to substantiate this I will give reference to patrons who comprise the best known citizens of Boston, New York, New Haven, Providence, Worcester, Springfield, Portland, Portsmouth, &c.

Those wishing to order by mail, send length of sleeve from centre of back, breast measure and height. For measure of "Hub" Drawers, for waist, follow dotted line, letter A.; hip, diagonal as per dotted line B.; inseam, E.; calf, C. Those wishing samples and personal attention, send postal to this address:
